voltage surge is defined as sudden rising of voltage to a high peak in very short duration. The voltage surges are transient in nature, that means they exist for very short duration.

Overvoltage Protection | Electrical4U

Overvoltage protection is a characteristic of a power supply system, which somehow deals with the voltage across the load side when the input voltage exceeds the pre-set value. In some situations where the input voltage is higher than expected, we always use an overvoltage protection or crowbar protection circuit.

Simple Overvoltage Protection Circuit using Zener Diode

Overvoltage protection is a power supply feature which cutoffs the supply whenever input voltage exceeds the preset value. For protection from high voltage surge, we always use overvoltage protection or crowbar protection circuit. Crowbar protection circuit is a type of overvoltage protection which is most commonly used in electronic circuits.

Surge Suppressor Units | RS Components

Surge protective devices (SPD) assist in the protection of valuable electrical and electronic equipment against transients, originating from lightning and also from switching sources.

Guide to Surge Protection Devices

Surge Protection under BS EN 62305 BS EN 62305 requires that surge protection must be included as part of a lightning protection system, to safeguard the building, and the people and equipment within it, from the damaging effects of transient over-voltages.

Overvoltage Surge Protection - Technical Note

The overvoltage caused television sets to catch fire and were thrown out the front doors, exploded light bulbs, fried computers, destroyed surge protectors, blew up the Smart meters, and sparks shot out of wall outlets. The overvoltage only ended when the Smart meters blew up, or after 90 minutes when the power was physically cut.

Overvoltage - Wikipedia

Overvoltage protection serves to prevent damage to electrical and electronic devices as a result of excessive voltages. Overvoltage protection devices (surge protection devices, or SPD for short) generate equipotential bonding between the connected conductors when excessive voltage is applied.
