(PDF) Polymer characterization (II) - ResearchGate

Polymer characterization is the analytical branch of polymer science. The discipline is concerned with the characterization of polymeric materials on a variety of levels. The characterization typically has as a goal to improve the performance of the material. As such, many characterization techniques should ideally be linked to the desirable properties of the material such as strength, impermeability, thermal stability, and optical properties. Characterization techniques are typically used to de

Polymer characterization - Wikipedia

INTRODUCTION • “Polymer” means “many parts.” • Use of polymer in drug delivery is guided by various properties like; □ molecular properties □ bulk properties • Polymer characterization is the process of determining the size, structure and physical properties (such as thermal and mechanical properties) of polymeric materials. 3 4.

Thermal Analysis and physical property testing are vital to understanding polymers and their characterization. Impact Analytical has the experience and knowledge to analyze polymer materials for a wide range of applications. Our laboratories are equipped with the most advanced instrumentation to characterize the thermal properties of polymers, including glass transition (Tg), melt temperature (Tm), heat of fusion, heat capacity, weight loss, thermal stability, and more.
