CHAPTER 10 Anatomy of the Muscular System

Abstract. This chapter covers the internal and external anatomy of the heart, its positioning within the thorax, and its basic function. Briefly, the heart is a muscular pump, located in the protective thorax, which serves two functions: (1) collect blood from the tissues of the body and pump it to the

lungs and (2) collect blood from the lungs and pump it to all the tissues of the body.

Chapter 10: The hand Hand The hand is distal to the forearm, and its skeletal framework includes the carpus, or wrist. In lay usage, however, the word "wrist" is used for the distal end of the forearm, a wrist-watch being worn over the lower ends of the radius and ulna. The position of the hand at rest is shown in figure 11-1. The hand is of enormous importance, particularly the thumb.
