Ford Cortina Mk.II Technical Specifications

But let's break it down. The exposure triangle consists of the shutter speed, aperture, and ISO. Shutter and Aperture Priority modes allow you to set the shutter/aperture with a set ISO, while Auto ISO with Manual Mode allows you to set both the shutter speed AND aperture and lets the camera set the ISO to make a correct exposure (within ISO limits that you choose).

Why Auto ISO+Manual Mode Is the 'Best' Auto Exposure Mode

Sure, we're all familiar with Program, Aperture Priority, Shutter Priority, and Manual – but there's one that's left off of the list – and that's Manual Mode with Auto ISO. Basically, this setup allows you to adjust your F/stop and shutter speed to exactly what you want and it floats the ISO in order to generate a proper exposure.
