Mitsubishi Canter - How to remove rear drums? - Arb-Trucks ...

The rear brake drums are retained onto the spindle assembly with a cotter pin which locks a nut in place. Remove the cotter pin, and spin the nut off, then remove the washer behind the nut, and the brake drum assembly slides off. You must catch the outer wheel bearing as the assembly is sliding off. When reinstalling, the bearings need to be set with just about .001" of free play. Reinstalling TOO tight will burn up the bearings.
