Music Theory Through Improvisation

A New Approach to Musicianship Training *Routledge*

Designed for Music Theory courses, *Music Theory Through Improvisation* presents a unique approach to basic theory and musicianship training that examines the study of traditional theory through the art of improvisation. The book follows the same general progression of diatonic to non-diatonic harmony in conventional approaches, but integrates improvisation, composition, keyboard harmony, analysis, and rhythm. Conventional approaches to basic musicianship have largely been oriented toward study of common practice harmony from the Euroclassical tradition, with a heavy emphasis in four-part chorale writing. The author's entirely new pathway places the study of harmony within improvisation and composition in stylistically diverse format, with jazz and popular music serving as important stylistic sources. Supplemental materials include a play-along audio in the downloadable resources for improvisation and a companion website with resources for students and instructors.

The Instant Composers Pool and Improvisation Beyond Jazz *Routledge*

The Instant Composers Pool and Improvisation Beyond Jazz contributes to the expansion and diversification of our understanding of the jazz tradition by describing the history and practice of one of the most important non-American jazz groups: The Instant Composers Pool, founded in Amsterdam in 1967. The Instant Composers Pool describes the meaning of "instant composition" from both a historical and ethnographic perspective. Historically, it details instant composition's emergence from the encounter between various overlapping transnational avant-gardes, including free jazz, serialism, experimental music, electronic music, and Fluxus. The author shows how the improvising musicians not only engaged with the cultural politics of ethnicity and race involved in the negotiation of the boundaries of jazz as a cultural practice, but transformed the meaning of music in society—particularly the nature of improvisation and performance. Ethnographically, The Instant Composers Pool encourages readers to reconsider the conceptual tools we use to describe music performance, improvisation, and creativity. It takes the practice of "instant composition" as an

opportunity to reflect on music performance as a social practice, which is crucial not only for jazz studies, but for general music scholarship.

Jazz on the Line

Improvisation in Practice *Routledge*

Jazz on the Line: Improvisation in Practice presents an ethnographic reflection on improvisation as performance, examining how musicians think and act when negotiating improvisational frameworks. This multidisciplinary discussion--guided by a focus on recordings, composition, authenticity, and venues--explores the musical choices made by performers, emphasizing how these choices can be logically understood within the context of controlled, musical outputs. Throughout the text, the author engages directly with musicians and their varied practices--from canonized dogmas to innovative experimentalism--offering interviews both planned and spontaneous. Musical agency is posited as a tightrope balancing act, signifying the skill and excitement of improvisational performativity and exemplifying the life of a jazz aerialist. With a travel journal approach as a backdrop, *Jazz on the Line* provides concepts and theories that demystify the creative processes of improvisation.

Theory and Practice of Technology-Based Music Instruction

Second Edition *Oxford University Press*

Technology is an increasingly popular part of music education in schools that attracts students to school music who might not otherwise be involved. In many teacher preparation programs, music technology is an afterthought that does not receive the same extensive treatment as do traditional areas of music teaching such as band, orchestra, choir, and general music. This book helps to establish a theoretical and practical foundation for how to teach students to use technology as the major means for developing their musicianship. Including discussions of lesson planning, lesson delivery, and assessment, readers will learn how to gain comfort in the music technology lab. *Theory and Practice of Technology-Based Music Instruction* also includes "profiles of practice" that dive into the experiences of real teachers in music technology classes, their struggles, their successes, and lessons we can learn from both. In this second edition, new profiles feature Teachers of Color who use technology extensively in their varied types of music teaching. This edition encourages readers to think about issues of inequity of social justice in music education technology and how teachers might begin to address those concerns. Also updated are sections about new standards that may guide music education technology practice, about distance and technology-enhanced learning during the global pandemic, and about ways to integrate technology in emerging contexts.

Composing for the Jazz Orchestra *University of Chicago Press*

"Although it will be of primary interest to those who are engaged in composition themselves, [this] book is also recommended for readers who may wish to gain further insight into just what makes jazz composition so different from traditional approaches."—Malcolm Bessom, *The Music Magazine*

Fundamentals of Musical Composition *Gardners Books*

Fundamentals of Musical Composition represents the culmination of more than forty years in Schoenberg's life devoted to the teaching of musical principles to students and composers in Europe and America. For his classes he developed a manner of presentation in which 'every technical matter is discussed in a very fundamental way, so that at the same time it is both simple and thorough'. This book can be used for analysis as well as for composition. On the one hand, it has the practical objective of introducing students to the process of composing in a systematic way, from the smallest to the largest forms; on the other hand, the author analyses in thorough detail and with numerous illustrations those particular sections in the works of the masters which relate to the compositional problem under discussion.
