Hull White Model
Calibration Personal
 The calibration of the
 Hull-White model is
 used to prepare the
 data for valuation runs

in Market Risk Analysis. The model is calibrated automatically in the price calculation immediately before a transaction is priced. You call the function for manual calibration independently of the valuation runs.

Calibration of the Hull-White Model - SAP

In the Hull-White model, there are two parameters related to the short rate process: mean reversion and volatility. Calibration is used to determine these parameters, such that the model can reproduce, as close as possible, the prices of caps or floors observed in the market.

Calibrating Hull-White Model Using Market Data - MATLAB ...

The calibration of the Hull-White model is used to prepare the data for valuation runs in Market Risk Analysis. The model is calibrated automatically in the price calculation immediately before a transaction is priced.

Calibration of the Hull-White Model - SAP

The General Hull-White Model and Super Calibration There are two major approaches to modeling the term structure of interest rates. One approach is to model the evolution of either forward rates or discount bond prices. This approach was first developed by Heath, Jarrow and Morton (HJM, 1992). In this paper

The General Hull-White Model and

Super Calibration

And for the fact of treating T in the integral limit as a constant, I don't think it's possible because during the whole proof of the Hull&White calibration the T inside the variable $B(t,T)$ is the same as the one in the integral limits so either both of them are constant or both of them are variable at the same time.

$\$ \endgroup \$$ - Xman
Jun 4 ...

Proof of the Hull & White Model calibration

Consider the one-factor Hull-White model

$$\mathrm{d}r(t) = (\theta(t) - \kappa r(t)) \mathrm{d}t + \sigma \mathrm{d}W(t)$$

When one calibrates the model to market data one chooses

$$\theta(t) =$$

$$\frac{\partial f^M}{\partial T}(0,t) + \kappa f^M(0,t) + \frac{\sigma^2}{2\kappa} \left(1 - \mathrm{e}^{-2\kappa a t} \right)$$

yield curve - Details of calibration of Hull-White model ...

These implementation notes are taken for the calibration of one-factor Hull-White model assuming piecewise constant volatility, with double initial rate curves, on European swaptions. Keywords: Interest rate models, model calibration, Hull White, model implementation.

Hull-White Model Calibration Notes by Heng Sun :: SSRN

I am calibrating a HW1F from "The General Hull-White Model and Super

Interest Rate and Credit Models - Baruch MFE Program

In this article, the authors propose an alternative approach for pricing bond options and swaptions

under the one-factor Hull-White model. Their proposal differs from the existing models used to evaluate these type of instruments when the evolution of the term structure of interest rates is modeled by short-rate models.

Pricing Coupon Bond Options and Swaptions under the One ...

Chapter 2 introduces basic information of the Hull-White model and the Stein-Stein model, and, hopefully, gives readers a general idea on the study of option pricing problem. In Chapter 3, we comprehensively explain the Heston

model from its background to its derivation, and we make experiment to examine its parameters. Chapter 4 calibrates a ...

Valuing a European option with the Heston model.pdf ...

Calibration of a short rate model is the process of determining the short rate volatility and mean reversion parameters. These parameters are determined from market data of actively traded options (swaptions and/or caps/floors). FINCAD supports the following one factor short rate models: Ho-Lee, Hull-White, Black-Karasinski and Lognormal.
