Grand Theft Childhood

The Surprising Truth About Violent Video Games and What Parents Can Do *Simon and Schuster*

Listening to pundits and politicians, you'd think that the relationship between violent video games and aggressive behavior in children is clear. Children who play violent video games are more likely to be socially isolated and have poor interpersonal skills. Violent games can trigger real-world violence. The best way to protect our kids is to keep them away from games such as Grand Theft Auto that are rated M for Mature. Right? Wrong. In fact, many parents are worried about the wrong things! In 2004, Lawrence Kutner, PhD, and Cheryl K. Olson, ScD, cofounders and directors of the Harvard Medical School Center for Mental Health and Media, began a \$1.5 million federally funded study on the effects of video games. In contrast to previous research, their study focused on real children and

families in real situations. What they found surprised, encouraged and sometimes disturbed them: their findings conform to the views of neither the alarmists nor the video game industry boosters. In *Grand Theft Childhood: The Surprising Truth about Violent Video Games and What Parents Can Do*, Kutner and Olson untangle the web of politics, marketing, advocacy and flawed or misconstrued studies that until now have shaped parents' concerns. Instead of offering a one-size-fits-all prescription, *Grand Theft Childhood* gives the information you need to decide how you want to handle this sensitive issue in your own family. You'll learn when -- and what kinds of -- video games can be harmful, when they can serve as important social or learning tools and how to create and enforce game-playing rules in your household. You'll find out what's really in the games your children play and when to worry about your children playing with strangers on the Internet. You'll understand how games are rated, how to make best use of ratings and the potentially important information that ratings don't provide. *Grand Theft Childhood* takes video games out of the political and media arenas, and puts parents back in control. It should be required reading for all families who use game consoles or computers. Almost all children today play video or computer games. Half of twelve-year-olds regularly play violent, Mature-rated games. And parents are worried... "I don't know if it's an addiction, but my son is just glued to it. It's the same with my daughter with her computer...and I can't be watching both of them all the time, to see if they're talking to strangers or if someone is getting killed in the other room on the PlayStation. It's just nerve-racking!" "I'm concerned that this game playing is just the kid and the TV screen...how is this going

to affect his social skills?" "I'm not concerned about the violence; I'm concerned about the way they portray the violence. It's not accidental; it's intentional. They're just out to kill people in some of these games." What should we as parents, teachers and public policy makers be concerned about? The real risks are subtle and aren't just about gore or sex. Video games don't affect all children in the same way; some children are at significantly greater risk. (You may be surprised to learn which ones!) Grand Theft Childhood gives parents practical, research-based advice on ways to limit many of those risks. It also shows how video games -- even violent games -- can benefit children and families in unexpected ways. In this groundbreaking and timely book, Drs. Lawrence Kutner and Cheryl Olson cut through the myths and hysteria, and reveal the surprising truth about kids and violent games.

Extra Lives

Why Video Games Matter *Vintage*

Tom Bissell is a prizewinning writer who published three widely acclaimed books before the age of thirty-four. He is also an obsessive gamer who has spent untold hours in front of his various video game consoles, playing titles such as Far Cry 2, Left 4 Dead, BioShock, and Oblivion for, literally, days. If you are reading this flap copy, the same thing can probably be said of you, or of someone you know. Until recently, Bissell was somewhat reluctant to admit to his passion for games. In this, he is not alone. Millions of adults spend hours every week playing video games, and the industry itself now reliably outearns

Hollywood. But the wider culture seems to regard video games as, at best, well designed if mindless entertainment. Extra Lives is an impassioned defense of this assailed and misunderstood art form. Bissell argues that we are in a golden age of gaming—but he also believes games could be even better. He offers a fascinating and often hilarious critique of the ways video games dazzle and, just as often, frustrate. Along the way, we get firsthand portraits of some of the best minds (Jonathan Blow, Clint Hocking, Cliff Bleszinski, Peter Molyneux) at work in video game design today, as well as a shattering and deeply moving final chapter that describes, in searing detail, Bissell's descent into the world of Grand Theft Auto IV, a game whose themes mirror his own increasingly self-destructive compulsions. Blending memoir, criticism, and first-rate reportage, Extra Lives is like no other book on the subject ever published. Whether you love video games, loathe video games, or are merely curious about why they are becoming the dominant popular art form of our time, Extra Lives is required reading.

A World of Warcraft Reader *MIT Press*

World of Warcraft is the world's most popular massively multiplayer online game (MMOG), with (as of March 2007) more than eight million active subscribers across Europe, North America, Asia, and Australia, who play the game an astonishing average of twenty hours a week. This book examines the

complexity of World of Warcraft from a variety of perspectives, exploring the cultural and social implications of the proliferation of ever more complex digital gameworlds. The contributors have immersed themselves in the World of Warcraft universe, spending hundreds of hours as players (leading guilds and raids, exploring moneymaking possibilities in the in-game auction house, playing different factions, races, and classes), conducting interviews, and studying the game design--as created by Blizzard Entertainment, the game's developer, and as modified by player-created user interfaces. The analyses they offer are based on both the firsthand experience of being a resident of Azeroth and the data they have gathered and interpreted. The contributors examine the ways that gameworlds reflect the real world--exploring such topics as World of Warcraft as a "capitalist fairytale" and the game's construction of gender; the cohesiveness of the gameworld in terms of geography, mythology, narrative, and the treatment of death as a temporary state; aspects of play, including "deviant strategies" perhaps not in line with the intentions of the designers; and character--both players' identification with their characters and the game's culture of naming characters. The varied perspectives of the contributors--who come from such fields as game studies, textual analysis, gender studies, and postcolonial studies--reflect the breadth and vitality of current interest in MMOGs. Hilde G. Corneliussen and Jill Walker Rettberg are both Associate Professors of Humanistic Informatics at the University of Bergen, Norway.

The NYPD's Auto Crime Division

You might be surprised to learn crime does pay, especially auto

theft. During the 1990s, New York City was averaging over a hundred thousand vehicle thefts a year. New Yorkers accepted their fate, frequently finding empty parking spaces where their vehicles were parked the night before. Victims called the police, who took theft reports without offering much hope they would ever see their car again. The NYPD's Auto Crime Division is a hundred and twenty-member unit created to combat auto theft, stopping those who roam the streets at night looking to steal your vehicle. Most Americans have been the victim of some form of auto crime or know someone who has been. What they don't know is why, how, or who stole their vehicle, or what happens to it after it disappears. Grand Theft Auto peels back the curtain, exposing the nuts and bolts of the auto theft industry. Would you believe a pair of nuns stole Mother Superior's car to go on a wild shopping spree in the Bronx? Or the double-dealing confidential informant who helped recover Mike Tyson's stolen motorcycle minutes before it was shipped out of the country? What about the diplomat's husband who drove around Manhattan in a stolen Mercedes? Or the silver-tongued three-hundred-pound car thief who managed to stay one step ahead of the law? Retired detective Vic Ferrari shares his unique insight and colorful stories from his days assigned to the New York City Police Department's Auto Crime Division. If you enjoy Live PD, are fascinated with police work, or want to know who stole your car, you've picked up the right book. Vic Ferrari, author of NYPD: Through the Looking Glass: Stories From Inside America's Largest Police Department and The NYPD's Flying Circus: Cops, Crime & Chaos, and Dickheads & Debauchery and Other Ingenious Ways to Die is a retired New York City Police Department detective with over

twenty years of experience in the auto theft industry.
