In this article, we'll discuss how you can detect and repair the problem of block corruption within your Oracle database. What is a data block corruption? Data block corruptions occur whenever data is not in its expected state. The block may have contents that are not internally consistent, or it may have been altered

to be unrecognizable as part of the Oracle Database format. Some data block corruptions are relatively minor, affecting only a single block.

Detecting and Repairing Block Corruption within Oracle ...

August 28, 2011 | Filed under: Oracle. Database blocking is a situation where the statement run by one user locks a record or set of records and another statement run by the same user or different user requires a conflicting lock type on the record or records, locked by the first user. Database blocking issue is a very common scenario in any application.

Intelligent Track and Trace | Oracle

The Oracle row-level locking mechanism is well understood by Oracle experts, but here is some question about how row-level locking translated into data buffer block status changes. In a MOSC forum

discussion titled "Multiple buffer versions flooding the buffer cache", we see a DBA on Oracle 8.1.6.2 who claims to have 50 versions of a single data block in his data buffer.
