Using twice the labeled dose is recommended in goats for routine worming. Using three times the labeled dose is recommended for treating tapworm infections. Exceeding the labeled dose will result in extended drug residues. ** The labeled dose for moxidectin is 0.2 mg/kg.

Common Goat Medications and Easy to Understand

Dosages

Goats metabolize medications differently than other animals; drugs clear their system faster. As a result, goats require higher doses of drugs for effective treatment. Most of the drugs available for use on livestock are not labeled for use in goats and so are not labeled with the correct dose for goats.

In most cases, goats that are experiencing pain can be treated with non-steroidal anti-inflammatory drugs (NSAIDS), and you can often use the same over the counter medications you would use for your own pain relief. For instance, many goat farmers swear by regular Aspirin, and it is often the first thing a veterinarian will recommend as well.
