course Richard Fitzpatrick Associate Professor of Physics The University of Texas at Austin

Thermodynamics & Statistical Mechanics:

Statistical mechanics, one of the pillars of modern physics, describes how macroscopic observations are related to microscopic parameters that fluctuate around an average. It connects thermodynamic quantities to microscopic behavior, whereas, in classical thermodynamics, the only available option would be to measure and tabulate such quantities for various materials. Statistical mechanics is necessary for the fundamental study of any physical system that has many degrees of freedom. The approach
