In the USA regulatory requirements address water intake structures, air emissions, and discharge of blowdown water. Currently, under Section 316(b) of the Clean Water Act, it has been proposed to implement more stringent protection measures at water intake structures to protect fish, shellfish, and other aquatic life (USEPA, 2002a). This proposed regulation could lead to the need for retrofitting of once-through cooling water intakes and ultimately lead to increased use of recirculating systems.
