Sample response: The flags are a translation of each other, moving only a few coordinate points ahead but NOT changing their orientation or direction. In a rotation image, the image WILL change its orientation its held at and move the points left or right prior to their setting. In simple terms, a translation only moves the location of a image (which is true for this image), while a rotation will change its shape and rotate it into a new position.

The answer is that the coordinates of the reflection are (3, -6), (3, -1), (5, -6), (5, -1). Example 3. Determine if the change is the result of a translation, reflection or rotation. After a transformation, the vertices (3, 1), (0, 3), (1, 2) become (3, -1), (0, -3), (1, -2). First, look at the coordinates to see which coordinate changes.
