Restoration Of The Endodontically Treated

An endodontically treated tooth should

have a good prognosis. It can resume full function and serve satisfactorily as an abutment for a fixed dental prosthesis (FDP) or a removable partial dental prosthesis. However, special techniques are needed to restore such a tooth.

12: RESTORATION OF THE ENDODONTICALLY TREATED TOOTH

...

Restorations of endodontically treated teeth are designed to (1) protect the remaining tooth from fracture, (2) prevent reinfection of the root canal system, and (3) replace the missing tooth structure. According to the amount of tissue to be replaced, restorations of endodontically treated teeth rely on different materials and clinical procedures.

[PDF] Restoration Of The Endodontically Treated Tooth ...

Cusp fracture is a common occurrence in the heavily restored dentition, but

endodontically treated teeth with intra-coronal restorations are at higher risk and the occurrence of unrestorable subgingival cusp fractures is more common.¹⁰⁻¹² Using data from over 46,000 patients from 28 dental practices, Fennis et al. found only 20.5 cusp fractures per 1000 person years of risk.¹³ However, there was a positive correlation between endodontically treated teeth and subgingival fracture location.

Restoration of the Endodontically Treated Tooth

Restorations of endodontically treated teeth are designed to (1) protect the remaining tooth from fracture, (2) prevent reinfection of the root canal system, and (3) replace the missing tooth structure. Although the use of a crown built on post and core is a traditional approach, others have advocated the use of direct composite resins for restoring small defects in endodontically treated ...

Restoration of endodontically treated teeth

The aim of this chapter is to offer a guide, from the endodontist's perspective, as to how root canal-treated teeth should be restored, and to give some clinical recommendations to help meet these restorative goals. The endodontic and restorative components of treatment are typically considered as independent phases.

Endodontic Considerations for the Restoration of ...

The decision to dismantle and endodontically treat a tooth is difficult when a patient presents without symptoms and the tooth is heavily restored or restored with an extra-

coronal restoration. The tooth may or may not be restorable and it may be difficult to assess without dismantling the restoration.

Restoration of the root canal treated tooth

26. □ Restoration of endodontically treated teeth is of utmost importance to the success of the endodontic treatment. □ This brings the restored tooth/ teeth as close to the normal tooth in terms of physiological, functional and morphological demands. □ Restoration of the endodontically treated teeth serve two most important functions. 1.

Restoration of endodontically treated teeth

Restoration of teeth after endodontic treatment is becoming an integral part of the restorative practice in dentistry. Background. The clinical decision as to whether an endodontically treated (ET) tooth requires a post and a crown poses a challenge to dental practitioners.

Restoration of Endodontically Treated Teeth Review and ...

Many dentists find it difficult to choose between different coronal restorations after root canal treatment (RCT). Studies show that the coronal restoration may affect the endodontic prognosis. This student-based study had three aims. (1) Examine the choice of coronal restoration of endodontically treated teeth at a Scandinavian dental school, (2) examine the survival of these restorations and (3) evaluate the influence of the coronal restoration on

the outcome of the RCT.

Influence of the coronal restoration on the outcome of ...

Endodontically treated teeth (ETT) present with significantly different mechanical properties compared to vital teeth. ^{1,2} The modifications in the biomechanical properties and structural integrity of the teeth are most-likely attributed to the volumetric loss of the hard tissues, extent of carious lesion, fracture propagation, final cavity preparation in addition to the access cavity prior to endodontic therapy. ^{3,4,5,6,7}

Current options concerning the endodontically-treated ...

The guidelines for restoration of the endodontically treated tooth evolve from this assessment. ¹⁻⁷ The outcome of endodontic treatment has been documented in a number of studies. Typically, these studies are not accomplished with clinical evaluation but with radiographic evaluation only.

Restoration of the Endodontically Treated Tooth | Inside ...
